NEW DELHI 3 (INDIA);
The 20th February, 1950.

S. P. JAIN,

for Registrar General, India.

# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encushed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100. 500, 1.000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Smail-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simila.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 21st January, 1950—contd.

<sup>†</sup> Figures not available.

#### REMARKS

The figures of births and deaths shown in this statement for the week ending the 21st January 1950 relate to 193 towns with an estimated population of 25,543 thousands. The total number of towns is 224 and their population is 27,938 thousands. Thus 86% of the total number of towns representing 91% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,522 and 9,707 representing birth and death rates of 31.6 and 19.8 per thousand of population respectively.

(A) Indian States (Parts A and C).—The data here relate to 166 towns with an estimated population of 22,433 thousand Information for Bihar and Assam could not be included. The total number of towns is 192 and their population is 24,366 thousands. Thus 86% of the total number of towns representing 92% of the total population is covered. The numbers of births and deaths recorded in these towns were 13,894 and 8,882 representing birth and death rates of 32·2 and 20·6

per thous and of population respectively. The table at the end gives the position by provinces.

The towns of Aruppukottai and Tanjore in Madras recorded high death rates of  $54\cdot 9$  and  $52\cdot 0$  per thousand of population respectively. In Aruppukottai the high death rate was largely due to deaths from fevers and in Tanjore there was a large number of deaths from Cholera.

(B) States (Part B):—The data here relate to 27 towns with an estimated population of 3,110 thousands. The total number of towns is 32 and their population is 35,72 thousands Thus 84% of the total number of towns representing 87% of the total population is covered. The numbers of births and deaths recorded in these towns were 16,28 and 825 representing birth and death rates of 27·2 and 13·8 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
